Masonite is a unique, integrated building products company with its Corporate Headquarters in Florida. Masonite operates more than 80 facilities in 18 countries, spanning North America, South America, Europe, Asia and Africa. Masonite sells its products - doors, components and entry systems - to a wide variety of customers in over 50 countries. It employs over 13,000 people globally and 268 are based in Ireland.

Jackie Guckian, Finance Analyst, was involved in the initial purchase of their payroll software back in 2003. According to Jackie, they chose Megapay from Intelligo Software because, "I worked with Intelligo Software previously using their payroll system for small to medium sized companies, I found the product to be user friendly, the customer support to be timely and updates to the system implemented in a professional manner. Therefore the obvious choice in implementing a corporate payroll system for our facility was their larger client server payroll software, Megapay.

"Megapay is secure and flexible; it allows multi users and has good audit trail reporting. We can set up new pay and deduction elements as we require them at the touch of a button. The majority of our employees work a shift pattern and Megapay makes the application of shift premiums a simple process", she added.

When asked for practical examples of how Megapay has helped to meet Masonite's business needs, Jackie replied, "The report generator in Megapay is very strong. As the needs of our business change, we have to be able to create new reports and manipulate old ones, the training provided on the report writer function was excellent. Megapay has the ability to do a bonus run and this is something that we require from time to time".
