

Learning Disability Specialist installs VIP HR and Payroll Manager to support their administration departments

12th February 2007: Learning disability specialists, The Walkinstown Association, has invested in VIP HR and Payroll Manager, a combined Human Resource and Payroll solution that integrates seamlessly with one another. Since it has been installed, VIP HR Manager & Payroll Manager has allowed for quick, easy and accurate sharing of information between the HR and Payroll Department at The Walkinstown Association, ensuring that key employee data is entered only once with subsequent changes updated automatically between both systems.

Founded in 1967, The Walkinstown Association was set up in response to a need for a community based centre that would provide services for adults with learning disabilities. Over the last five years the company has grown substantially and now employs 72 staff that provides services to 130 adults from all parts of Dublin.

Austin O'Sullivan, Director of Finance and Administration, comments, "We had been with another payroll provider for about five years and found that as we grew, their payroll application could not grow with our Payroll and Human Resource demands. The most important thing for us was that a payroll system could track staff costs on an hourly basis across multiple cost centres and also keep an adequate record of all HR details such as training, sick leave, absenteeism and remove all paper files." VIP HR and Payroll Manager came out on top as the preferred solution.

He continues, "VIP HR Manager has enabled us to accurately record absences so we know what staff are absent from what department on a daily basis. Since the introduction of VIP Payroll Manager we have been able to accurately track expenditure on staff salary across a multitude of cost centres. This has enabled us to more efficiently allocate resources across different service offerings. The fact that VIP HR and Payroll Manager link means we only have to enter data once and it is available to all staff".

VIP HR and Payroll Manager was installed in The Walkinstown Association last August and has been up and running now for the past 6 months.

O'Sullivan concludes, "Both VIP HR and Payroll Manager are easy to use. The online documentation is excellent and the telephone backup is superb. You can always contact technical support straight away and they will ensure your query is solved before they hang up. No problem is too big or small for them to handle and they are always in good humour."

About The Walkinstown Association

www.walk.ie

Walkinstown Association recognises and promotes the rights and dignity of individuals with intellectual disabilities and their families. We provide a holistic service that is conducive to the growth and development of each individual. The aim of the service is to support and guide each individual to reach their full potential through the use of personal care plans and a key worker system.

Thus empowering the individual to participate as fully as possible within their local community and society in general. This in turn helps to increase the individuals choices, life experiences and quality of life. We provide the support, advice, guidance and professional service necessary to enable and empower families to provide for the welfare of their son or daughter.

About Intelligo Software Ltd

www.intelligo.ie

Established in 1996, Intelligo Software is one of the leading providers of Human Resource and Payroll Software in Ireland and the UK. The company offers both "boxed" HR and Payroll software aimed at small to medium sized enterprises and a larger client server payroll system aimed at large corporate organizations, Megapay payroll. The VIP Manager suite comprises both Personnel and Payroll software offering competitively priced, user-friendly solutions, which are a market leader in Ireland and the UK.

Intelligo Software's vast array of services which complement the VIP Manager Suite is designed to take away the headache associated with HR and Payroll, leaving organizations with more time to focus on their core business. With offices in Ireland, the UK and Spain, Intelligo Software offers its customers a wide range of services which include installation, training and support.
